ABOUT AKINSOFT

Turkiye's largest domestic software brand AKINSOFT, as a private sector enterprise with its own equity capital, has been on many platforms since the day it was founded with its professional business approach, young and dynamic staff, the value it gives to humanity, its structure that never compromises its goals and principles, and with its works around the world, managed to reach the top.

AKINSOFT, is a company founded by Özgür Akın, PHD in a 15m office in 1995 and established by identifying the individual performing vision today as the day it was founded and takes the place in the biggest brands in Turkey and in the world.

AKINSOFT has the Turkey's largest software archives with over 120 software. It serves software with more than 2000 solution partners in Turkey's 81 provinces and World's 36 countries and also produces high technology.

AKINSOFT with its ;
* Wide range of products,
* authorized dealer network
* with advanced support channels,

has been serving its customers for 29 years with its modern and rational solutions for almost all sectors. AKINSOFT, which operates in the software sector with the products grouped under commercial programs, ERP Solutions, Sectoral Programs, Cloud Based Programs, E-Commerce Solutions, E-Solutions, Mobile and Web-based programs, has become the leading company in its field with its brands. In the software industry, which is constantly evolving and many local and foreign companies are in close competition; AKINSOFT, which increases its product range and develops its existing product portfolio, has turned to designs that require high technology in accordance with the dynamics of the Turkish economy. In this context; AKINROBOTICS World's First Humanoid Robot Factory was established in 2017. AKINROBOTICS, which has 11.000 m2 open area and 3560 m2 closed area, is the first humanoid robot factory established in AKINSOFT, which can use and develop new technologies in the field of robotic technologies.

AKINROBOTICS, specializing in robotics, artificial intelligence and automation, has taken its place in Turkey and the world with humanoid robots today. With its marketing policy, AKINSOFT has opened the doors of cooperation and partnership to IT companies.Our company is one of the rare companies that has been able to create widespread and active sales channels, training centers and support points throughout Turkey today.

AKINSOFT Headquarters, Istanbul Regional Directorate and AKINROBOTICS continues to provide services to its customers with more than 2000 solution partners.

Local Software and Robotic Brand

Our Vision

Our Mission

Our vision is to be the pioneer of high technology in Turkey and say "We are here" to the world by assigning the sentence "There may not be any place where human and humanity are not valuable" as our principle.

Our mission is to deliver high technology to all sections and establish solution partner network in Turkey and all over the world to serve and support our customers the best.

As AKINSOFT, our target is to produce software within the framework of logic that provides yield, system, profit and time for the small and medium sized enterprises, provides Total Quality Management oriented understanding, leads the decisions of management and places Konya as the software center of the world. Additionally we aim to work with the philosophy of Total Quality Management and absolute customer satisfaction while presenting product development, sales, marketing, training after sales and technical support in a consistent and planned structure.

We Are AKINSOFT
We do not dream, but plan...

AKINSOFT has been established
in a 15m2 office;
· Without a computer hard disk,
· Without any financial support
on April 12, 1995.

Our Visions Defined In 1995

2000 Vision; ✓Achieved
·Establishing AKINSOFT İstanbul Regional Directorate,
·Buying a car,
·Realizing the first visit of solution partner network,
·Focusing on software instead of hardware and software.

2005 Vision; ✓Achieved
·Becoming the highest tax payer in Konya,
·Reaching the potential of employing 300 people,
·Laying the foundations of foreign trade,
·Being the pioneer of software in Turkey.

2010 Vision; ✓Achieved
·Starting R&D works regarding robotic technologies,
·Opening AKINSOFT İstanbul Plaza,
·(We achieved the goals of starting R&D works on robotic
technologies and setting up AKINSOFT Istanbul Plaza,
one year before the expected time which is 2010. We
started to get into the act in the media sector in 2009 by
publishing INOVAX magazine.);
our company is planning to actualize Satellite City Project
as well as in-tending to be the pioneer of software in the
world and increase the staff number to 30.000.

2015 Vision; ✓Achieved
· Starting serial production of the robotic technologies
that are designed with artificial intelligence to make
people's life easy.

2023 Vision; ✓Achieved
(At the groundbreaking ceremony of Robotic Factory on
26 December 2015, We have an-nounced our 2023 vision
we have been keeping as a secret since 1995.);
· Opening the AKINSPACE High Technology Institute.
  Space Sciences, Artificial Intelligence, Robotics
With the cooperation of AKINROBOTICS and BAHÇEŞEHİR UNIVERSITY, the Artificial Intelligence and
Robotics Technologies Master's Program has opened.

WOLVOX MRP II (Manufacturing Resource Planning)

With WOLVOX MRP II, needs and producti-on-based planning will cease to be a workload for businesses.

"WOLVOX MRP II" will answer the basic questions of production, such as which product will be produced and supplied, when, how, by whom, in what quantity, in what time, and at what cost.

The automotive industry, food, construction companies, telecommunications, electro-nics, he-alth and medical, furniture/wood manufacturing and merchandising from pro-duction to sales in various industries such as medium and large businesses who want

You can control all of your customers' operations and receive various Reports / Analyses on a single screen.

Customer satisfaction or new customer search and customer follow-up enable us to focus on the production of products in high demand. With our CRM solution, your business will proceed much more systematically.

By planning distribution according to regional demand, it also allows special work to be done on products and services that are low in sales.

Our program can be used by all small and large enterprises who want to follow up field sales operations, plan campaigns and customer interviews and measure customer satisfaction, follow up appointment, interview, offer, sales and other related after sales processes.

- By creating customer lists, multiple operations can be performed in list base.
- By creating campaign definitions, comparisons in amount base can be performed for the campaign plannings and results.
- By creating project and sales tracking records, you can link them with the existing campaigns.
- You can instantly create activity record for your customes calling through Caller ID Support
- Survey records can be created, survey entries can be made and survey reports can be taken

- Activity type, support type, notification way, support status, support priority and sector definitions can be created.
- Meeting, appointment, tasks to do and similar activities can be recorded through orginizer feature.
- You can view your agenda and you can watch on which day at what time you are busy.
- The reminder system allows you to give voice and video alerts ahead of the time you specify your activities,
- You can keep track of the technical support you provide to your customers.

Human Resources

It is a program suitable for businesses of all sizes and sectors who want to control personnel clock in/clock out, follow up payroll and timesheet operations as well as personnel personal information.

It caters to businesses that want to control personnel entry and exit through barcode proximity cards and fingerprint reader systems, and to businesses that want to carry out personnel personal information and salary monitoring.

Control personnel entrances and exits with the WOLVOX Gate display. You can use your program web-based with WOLVOX Online HR. It appeals to all businesses that want to follow up on visitors to the company.

To increase the efficiency of your human resources processes, WOLVOX Human Resources Management is the solution you are looking for !

The most difficult area in the administrative part of your business is personnel management, recruitment and placement processes, employee salary calculations, clock in/clock out etc. The WOLVOX Human Resources Program enables you to manage your office management in the most accurate and healthy way.

- With fingerprint, face recognition, proximity and barcoded cards, you can track your personnel's entry and exit.
- You can determine the duration of your staff's tardiness and reflect it on your salary if you wish.
- You can determine the overtime period of your staff and make them pay overtime at the desired coefficient.
- You can add files to personnel cards. (The files you add will remain in the program even if they are deleted from your computer.)

- You can edit your staff's ratings individually or collectively.
- You can have job applications automatically enrolled in the Human Resources Program by taking job applications through your website.
- You can enable your staff to view their monthly working hours and salary status by logging in via your website with their username and password.
- You can receive reports about participation in the organized training and activities.

- The license system is determined by the number of instant users. Therefore, you can use the application from the desired device and the computer within the user limit.
- Because it is web-based, it provides speed advantage in remote connections.
- You can continue to use your report designs in Wolvox ERP. Your reports will be presented to you in PDF format.
- Share your proposal as a link with your suppliers via e-mail.
- Your suppliers save by clicking the link and filling out the offer. Thus, you do not need to save the offers received separately in the program. You can get a report quickly.

AKINSOFT Performance Management System

AKINSOFT Performance Management System is the "AKINSOFT Bonus system", which starts on August 1 and ends on July 31 each year, where our dealers, main dealers and regional dealers in Turkey and our dealers and distributors abroad can benefit. Our solution partners earn bonuses according to the criteria determined.

In this system, not only the sales made, but also the studies related with AKINSOFT and the importance attached to institutionalization are important.

Thanks to the AKINSOFT Performance Management System (Bonus System), we determine which Solution Partners show more interest and work for AKINSOFT.

As a result, we finalize our work both by rewarding at the end of the Bonus Period and by raising the company's reference.In addition, directing our customers who call AKINSOFT Konya Plaza to our dealers and the ranking of our dealers on the map on our site are determined according to their performance in the bonus system. This performance is based on the total bonus and mainly the bonus increase of our Solution Partners during the month varies depending on.

In this system, it was aimed to have a fair distribution and it was calculated based on the competitiveness and development index of each country, and the bonus gained by the firms was made reality according to these coefficients. As a result; A structure that our solution partners, who work, follow, give priority for AKINSOFT would win, has been built and importance has been given to equality in this structure as much as possible.

One of our main goals in the bonus system is to ensure the synergy among AKINSOFT Solution Partners.

Until now, AKINSOFT has crowned the success of its Solution Partners with;

- A perfect 5-star hotel vacation, for 4677 people
- 32 latest model cars,
- 11 motorcycles,
- 91 laptop PC,
- 64 televisions,
- 71 mobile phones,
- 103 tablets
- 20 robot rental awards
- 10 corporate office furniture

and many surprise gifts in the Bonus Period Award Presentations and Vacation Organizations that it has traditionally organized for 14 years, with participation of more than 2000 Solution Partners from 36 countries.

AKINSOFT not only supports Solution Partners in our country and abroad in terms of software, but also supports education with training and certification programs. Many universities, high schools or private education institutions and Solution Partners were given one-to-one training of AKINSOFT programs and awarded 9731 participants with the Wolvox Training Certificate.

AKINSOFT is in media sector; INOVAX

The magazine, named as INOVAX which includes the news on technology, science and economy, was started to be publised in May 2009 and gave media sector a new lease of life. It is published one time in 3 months and includes current technological developments. INOVAX that is sent to all solution partners of AKINSOFT as free, is distributed to companies, state institutions and organizations, associations also.

•AKINSOFT İstanbul Plaza was opened.
•R&D works on robotics technologies which is stated
in the vision of 2010 was started.
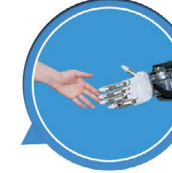

2010
•Starting R&D works on robotics technologies,
•Opening AKINSOFT İstanbul Plaza.
(We achieved the targets of starting R&D works on robotic
technologies and opening AKINSOFT İstanbul Plaza one yea
of the expected time which is 2010.)

2011
•The field works of AKINSOFT Sugar Beet Robot
AS-PNCR-1 was started.
•The First Native Humanoid Robot Prototype
introduction was done.

2012
•The field works of AKINSOFT
Agricultural Robot AS-PNCR-2 was done.
•www.akinsoftstore.com website was opened.
•AKINSOFT took place in 15 countries.

2013
•AKINCI-2 which is the first humanoid
robot and produced in Turkey
was given away to humanity at
18th years of AKINSOFT.

2014
•The Humanoid Robot AKINOID (AKINCI-3)
Prototype was introduced.

2015
•Cadde Meram Cafe & Robotics Application Center was opened.
•ADA The First Waiter Robot of Turkey started to serve.
•The ground was broken for AKINSOF
T Humanoid Robot Factories.
•ADA The First Hostess Robot was presented at AKINSOFT
11th Bonus Term Award Presentation and
Groundbreaking Ceremony.

2016
.AKINSOFT corporate website has been renewed.
.AKINSOFT took its place in 28 countries.
.AKINSOFT Russian website is published.

2017
.Official launching of AKINROBOTICS, the first humanoid robot
factory in the world and presenting Humanoid Robot
ADA GH5 is realized

rezzta

2018
.AKINROBOTICS Technical Visits started
.Humanoid Robot AKINCI-4 introduced
.Quadruped robot ARAT introduced
.Online Food Platform REZZTA introduced

2019
.INOVAX is 10 years old
.Mini ADA started its duty in Istanbul Airport
.Quadruped robot ARAT 3.1 introduced
.Robot Arm 1-2 and 3 introduced
.AKINCI-4 completed

2020
.AKINSOFT celebrated the 25th year with the new logo
.Arat-3.2 introduced
.UV-C Sterilization robot introduced
.Order preparation automation introduced

2022
.Four-Legged Robot Project ARAT 4.1 has been
commercialized.
.Service Robot Project Service Robot 1.2 introduced
.Four-Legged Robot Project ARAT 4.2 introduced.
.Service Robot Project Service Robot 2.1 was launched.
.Social Robot Project ADA 7 was introduced.
.Istanbul Robot Museum was opened.
.Reconstruction equipped with Solar Energy Systems
Istanbul Plaza Building was opened.

2021
.UV-C Sterilization robot v2 introduced
.Servis Robot P introduced
.Service Robot 1.1 introduced

2023
.Opening the AKINSPACE High Technology Institute.
 Space Sciences, Artificial Intelligence, Robotics
With the cooperation of AKINROBOTICS and
BAHÇEŞEHİR UNIVERSITY, the Artificial Intelligence
and Robotics Technologies Master's Program has opened.

AKINROBOTICS ROBOTIC TECHNOLOGIES ADVENTURE

The world's first humanoid robot factory AKINROBOTICS is a private sector enterprise established with the own capital of AKINSOFT, Turkey's largest domestic software company in the field of robotic technologies.

Robots produced under AKINROBOTICS have been designed by AKINROBOTICS' own capital, with the R&D studies of its engineers, and is prepared with the aim of 100% domestic production. With its highly equipped staff, it produces all of the robots it has developed without being dependent on foreign sources.

AKINROBOTICS, which has a robotic application area of 11.000 m^2 and a closed working area of 3560 m^2, is the first Humanoid Robot Factory to make mass production with a team of engineers and technicians who are experts in their fields.

In order to increase the interest of Turkish people in science, developing technology and scientific thought, and at the same time, to move our country to the top with the studies in the field of robotic technologies, it has started to work by adopting a superior service quality approach.

AKINROBOTICS, which aims to serve humanity and science, aims to increase the quality of social life and to allow people to work in more qualified jobs by loading monotonous jobs that are contrary to human ergonomics and endangering life to robots.

AKINROBOTICS, as a private sector enterprise established with its own capital, continues on its way in this success story.

Achieving each one of its visions determined on April 12, 1995, the day it was founded, AKINSOFT shared with the public in 2009, one year earlier than planned, that it started working on Robotic Technologies as it was one of its visions for 2010.

AKINROBOTICS Family Tree

AKINCI

- AKINCI-P
  25.06.2009 - 24.04.2010
- AKINCI-1
  26.08.2009 - 14.07.2011
- AKINCI-2
  15.07.2011 - 12.04.2013
- AKINOID-3 (AKINCI-3)
  13.04.2013 - 23.12.2014
- AKINCI-4

  20.08.2020 - 10.04.2021

Özgür AKIN, Ph.D.

AKINSOFT and AKINROBOTICS Chairman of the Board

He founded AKINSOFT on April 12, 1995. He graduated from Selcuk University with a degree in Computer Engineering, completed master's degree in Industrial Engineering and doctoral degree in Robotics Technologies at the Institute of Science. He made AKINSOFT one of the biggest software companies of Turkey through over 120 commercial and sectoral programs he developed, especially ERP E-Business software, exporting software supported in 7 different languages to 36 different countries.

In 2009, he started R&D activities on humanoid robots with the robotics department he established as a part of AKINSOFT. He blazed a trail developing the Turkey's first humanoid robot prototype 2-legged AKINCI series, agricultural robots PNCR series, service robots ADA series, hostess series Mini ADA and field robot ARAT series. Moreover, he opened Cadde Meram Cafe & Robotics Applications Center which is the first cafe in Turkey that the humanoid robots serve at. He achieved another international success by opening the "World's First Humanoid Robot Factory", AKINROBOTICS, which he had laid the foundations for in 2015 for the mass production of the prototypes he developed, in 2017.

At the same time, he opened the "World's First Humanoid Robot Museum" in Istanbul, where all the works carried out by AKINROBOTICS in the field of robotic technologies since 2009 are exhibited. In addition, with cooperation of AKINROBOTICS and BAHÇEŞEHİR UNIVERSITY, Artificial Intelligence and Robotics Technologies Master's Program is opened and realized its 2023 vision.

He held more than 100 seminars under the name of "Touch Your Utopia" in many institutions and organizations, especially in Universities, Chambers of Commerce and Industry. In addition, Özgür Akın, Ph.D is the author of book which name is "Touch Your Utopia", in the 2014-2015 academic year; He gave lectures as a lecturer in the Department of Mechatronics Engineering at the Faculty of Engineering of Karatay University.

As well as having hobbies such as skiing, sailing, diving, mountaineering, photography, writing poetry, playing musical instruments, horse riding, motor sports and playing tennis, Özgür Akın, Ph.D is also known for its animal lovers aspect. Known for his strong social personality besides the scientist identity Özgür Akın, Ph.D continues to work with the aim of serving science and humanity.
